

The BR 16 Ton Mineral Wagon

A Classic wagon available in 5" or 7 1/4" gauge

A mainstay of B.R.'s freight fleet was

the 16 ton all steel riveted mineral wagon. It is a classic design that has stood the test of time. This is a splendid, detailed replica designed in co-operation with Doug Hewson, complete with over 800 rivets! The

body and sheet metal parts are laser cut and all other components are fully machined so the kit may be assembled using basic hand tools only. The unpainted kit comes complete with everything you need to finish this fine model including full instructions and isometric drawings.

The kit is delivered in two separate instalments to spread the cost and workload. See below for kit content.

Payment terms:

Please refer to our current price list for pricing. All prices include VAT & delivery.

SPECIAL OFFER

- * Buy four, get the fifth for free*
- * Buy two, get third at half price*

Kit 1 is also available separately. Please ask for details.

THE GWR AUTOCOACH

This classic coach available in 5" or 7 1/4" gauge

The GWR Autocoach was designed to allow the locomotive to be operated from the engine or from the coach to obviate the need for the engine to 'run around' at the end of the route. The fireman stayed on the footplate whilst the driver communicated via a series of bells and whistles. It was not unusual for the locomotive to be sandwiched between a pair of coaches—a most attractive combination.

ModelWorks are pleased to have in stock an improved version of this popular coach. With better springing and sturdier body attachment it makes

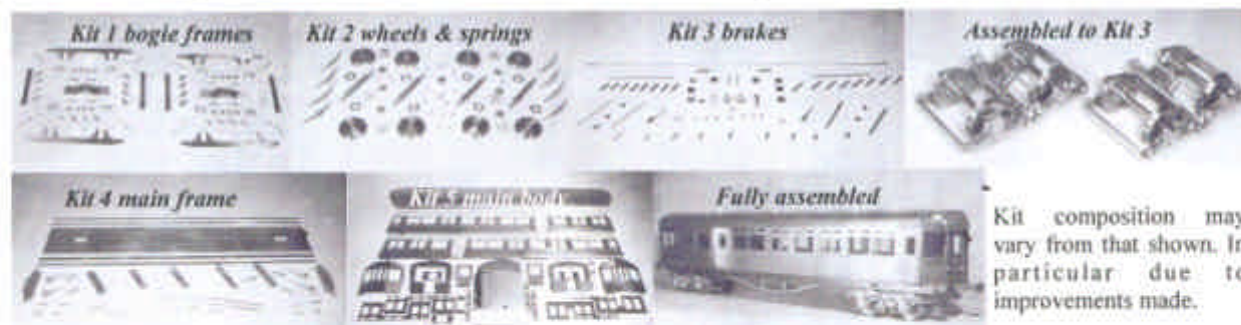

an ideal ride on coach. Comfortably able to take two medium sized adults the Autocoach makes the perfect accompaniment to the 5" gauge 14xx or any other locomotive.

All five kits are now available giving

you the option of purchasing your kits monthly or all at once.

Please refer to the current price list for pricing. All prices include VAT and delivery.

Kit composition may vary from that shown. In particular due to improvements made.
